Mini-CleanBoard

The compact PC keyboard for medical technology

Mini-CleanBoard

The compact PC keyboard for medical technology

Special requirements call for special solutions. The **keywi Mini-CleanBoard from Hoffmann + Krippner** is ideally suited for deployment in the area of medical technology.

With an IP65 rating, the **keywi** PC keyboard is splashproof, making cleaning easy and fast.

The ultra-flat design-housing delivers a product that is not only resistant to all common disinfectants but is also particularly attractive.

This also makes the **keywi** PC keyboard an interesting option for medical workplaces where a lot of data has to be entered.

- ⊙ Easy and fast cleaning
- ⊙ No chance for viruses and bacteria
- ⊙ Plug & Play – without installation

CLEANING AND DISINFECTION ADVICE

1. Basically, the keyboard can be cleaned using any standard disinfectant and/or cleaning agents. "Self-mixed" agents should only be used after checking first with the manufacturer.
2. The keyboard should not be immersed in disinfectant or cleaning agents. Immersing the keyboard in any other liquids is also not permitted.
3. Please take note of any relevant statutory regulations and guidelines.
4. Please take note of the handling advice given by the disinfectant and cleaning agent manufacturer.

The list of tested disinfectants and advice on cleaning and disinfection is available under www.clean-keyboards.com.

The recommendations and advice on cleaning our products are made, based on both internal and external research.
